Efficient

User-Friendly

Heated

Efficient performance means 60% more energy savings over other bun warmers.

User-Friendly one-switch operation means better temperature control and management.

Heated cabinet is designed to complement our best-selling and popular roller grills

Bun Warmer – Dry

Solid stainless steel construction provides long-lasting service and appearance, and includes reinforced stainless steel drawer slides and removable stainless steel wire rack.

Multiple sizes assure the perfect match for specific counter space requirements and dimensional compatibility with a wide range of roller grills.

Unique merchandising graphics are available for merchandising packages from your preferred branded meat supplier.

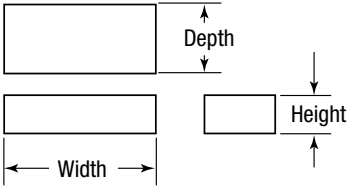

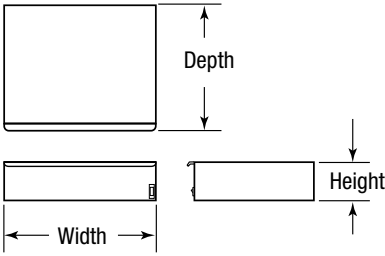

Evenly distributes warming heat through the drawer area. Simple one switch operation eliminates need for temperature adjustment.

Maintain moistness and extends shelf life by keeping product packaged in cabinet.

Optimum heating range of 100-110° (simple single switch operation).
